External Research Project Proposal

REF : "Proposal for Economic Analysis of a Foreign Electronic System",
[REDACTED] 31 March 1958. 25X1A5a1

1. Attached is an I/EE external research project proposal involving exploitation of available data on the Soviet B-200 system for the purpose of deriving economic intelligence information.

2. As presently constituted, this proposal confines itself to those areas of interest which are compatible with the mission and functions of I/EE, as well as meeting current needs expressed by I/CM. As a consequence, it is considerably narrower in scope than the project envisaged by the contractor which would involve not only the interests of I/EE, but also those of I/ME, A/U, and S/CST at least.
